GWS-72P	72	2.63
GWS-86P	86	3

WIRE SHELVING ASSEMBLY INSTRUCTIONS

1. Determine the position of your lowest shelf.
 - o Note: For food service applications, NSF requires a 6" clearance from the floor .
2. At the lowest groove where a shelf will be located, snap one half of a plastic shelf support (wider part down) on the post. Snap on the remaining half of the support and slide up or down until secured into the groove. Repeat for other posts.
3. Insert each post from the BOTTOM of the shelf until the plastic shelf supports fit firmly inside the shelves.
4. After the last post is inserted, return the unit to the upright position and gently tap the shelf down until completely secured.
5. Continue to affix plastic shelf supports to posts and secure shelves as needed.
